

Below please find an update on the 69 kilovolt (kV) power line rebuild project in the Derry Township neighborhood for the month of April. If you have questions, please email HersheyProject@pplweb.com or call us at 717-560-2484.

- Our team spent the past month planning, coordinating and testing the electrical settings at our substations. We plan to energize the aboveground line that connects the Hershey and South Hershey substations by the end of April.
- The aboveground line will be removed once the underground line is complete. We anticipate removing the aboveground line by end of 2020.
- We reviewed our plans to move our poles underground with Comcast and Verizon. Ultimately, the decision on whether the communication lines are routed underground with our lines is Comcast and Verizon's decision.
- Our team is currently in the stages of designing the underground transmission line. As part of that process, you may see PPL employees or subcontractors in the Hershey area gathering information and digging test holes and soil borings.
- We'll continue to keep you updated on the project by sharing monthly updates in the Derry Township eNews and sending letters bi-monthly. As construction begins, we will also provide door-to-door outreach to impacted residents.
